

PYRO-CLINX ENERGY PACKAGE

SHAPE YOUR SUSTAINABLE ENERGY FUTURE WITH PYRO-CLINX: CONVERT WOODY RESIDUES EFFICIENTLY INTO GREEN ELECTRICITY AND HEAT - AND PRODUCE VALUABLE BIOCHAR AT THE SAME TIME.

OUR INNOVATIVE ENERGY PACKAGE COMBINES COST-EFFECTIVENESS WITH INNOVATIVE PROGRESS.

Rising energy prices and a lack of security of supply are hampering production and investment. With our Pyro-ClinX energy package, we set an example for stability and support your company in overcoming the challenges of the energy crisis in the long term.

ENERGY PACKAGE

- ✓ ENERGY SYSTEM PYRO-CLINX 150
- ✓ IDEAL FOR ELECTRICITY, HEAT & BIOCHAR INCLUDING THE PLANNING OF YOUR PROJECTS
- OPTIONAL: FUEL STORAGE SYSTEM
MODULAR-BASED FROM 36 M³ (incl. fuel feeding system; opt. with drying)

OPTIONAL ENTRY PACKAGE: ENERGY PRE-PROJECTION

The pre-project phase is the first step in realizing a project. In this phase, all basic framework conditions are defined: technical requirements, economic feasibility and individual objectives.

It serves to create a sound basis for decision-making and to develop the optimal plan for implementation. This ensures that your project can be realized efficiently and successfully.
